Dear Patient:

Thank you for choosing me to perform your “No-Needle, No-Scalpel Vasectomy.” The procedure is done through a single puncture into the scrotum and requires no suturing. There are virtually no complications associated with this new method. It represents a significant improvement over the conventional technique. I have had special training for this procedure and am certified by the Association of Voluntary Surgical Contraception.

PLEASE BE SURE TO FOLLOW THESE DIRECTIONS PRIOR TO COMING TO THE OFFICE:

- 1. Please eat normally and drink plenty of fluids the day of your procedure.**
2. Shave your scrotum and base of the penis.
3. Your wife is required to come to the appointment with you. She will be required to sign a consent form before the procedure. If you are single, please have someone accompany you to drive you home.
4. A prescription is enclosed for one (1) Valium and fourteen (14) Bactrim DS, an antibiotic. You will take one of each just before leaving home to come to your appointment and then one Bactrim DS twice a day with food until the prescription is taken completely. You will also need to take two (2) Extra-strength Tylenol along with the prescription. DO NOT substitute the Tylenol with aspirin.
5. Please call us thirty (30) minutes prior to your appointment to confirm.

It is required that you bring your insurance card to the office at least two weeks prior to your appointment so that your benefits and pre-certification requirements can be checked. You will be required to pay any co-pay and/or deductible before the procedure. Our office accepts cash, checks, and Master Card/VISA credit cards.

If you have any medical conditions requiring pre-medication such as mitral valve prolapse, please let us know prior to the appointment.

Please give us a call with any questions or concerns. Again we would like to thank you for allowing me to do your procedure.

Sincerely,

Mike S. Chiang, M.D.
